Pro Shop 518-585-2801 Summer 2017 Emeralds 518-585-7435

From the Pro Shop

Please Sign In!!!

We ask that all players please check in at the pro shop before playing, we need everyone's cooperation in doing this so we can accurately track our number of rounds played thank you.

U.S.G.A. GHIN SYSTEM

GHIN is the U.S.G.A. Golf Handicap Index System, golfers should post all their 9 and 18 hole scores every time they play. Each score should be adjusted under the Equitable Stroke Control rule (ESC) which is the downward adjustment of Individual hole scores for handicap purposes, based on handicap you are allowed a maximum score on individual holes. Check the chart near the pro shop computer to find your max score.

Spring Tip

Bunker Shots: Remember to open your clubface a little, try to hit an inch or two behind the ball this helps control the shot, and make sure you finish your swing! This will help you avoid getting the club stuck in the sand.

From the Course Superintendent

The extremely wet April, May, and June and heavy rains on July 1st caused the heaviest course flooding since Hurricane Irene. Please take a look at the pictures in the pro shop and you can see how well the new greens performed. The fourth and seventh were totally under water, please help us in reaching our fundraising goals to raise these areas of the course.

Renovation Update

The 14th fairway and rough has been seeded. Left of 10th cart path seeded, 16 pond edges reseeded. Temporary greens for 4 and 7 are in. New 11, 12, & 15 greens aerified. New 11 & 12 tee surrounds sodded. New 14 green and approach ready for seed and sod. Ongoing work on paths and their edges.
